FREIGHT **BUDDY**

What FreightBuddy does?

Step 1: Enter the Package details & Shipping details either manually or by integrating with inventory system that automatically takes the required data from inventory system. Provide the source country & destination country.

Step 2: FreightBuddy will list down the various courier services that you are dealing with and its charges. Find Best Courier by comparing the shipment cost and the transit date

Step 3: FreightBuddy provides an option to save this transaction for your future reference. Once the invoice received, the freight audit can be done by finance team in no time.

Step 4: After judging on the courier service options, Freight Buddy allows you to book through the respective courier service.

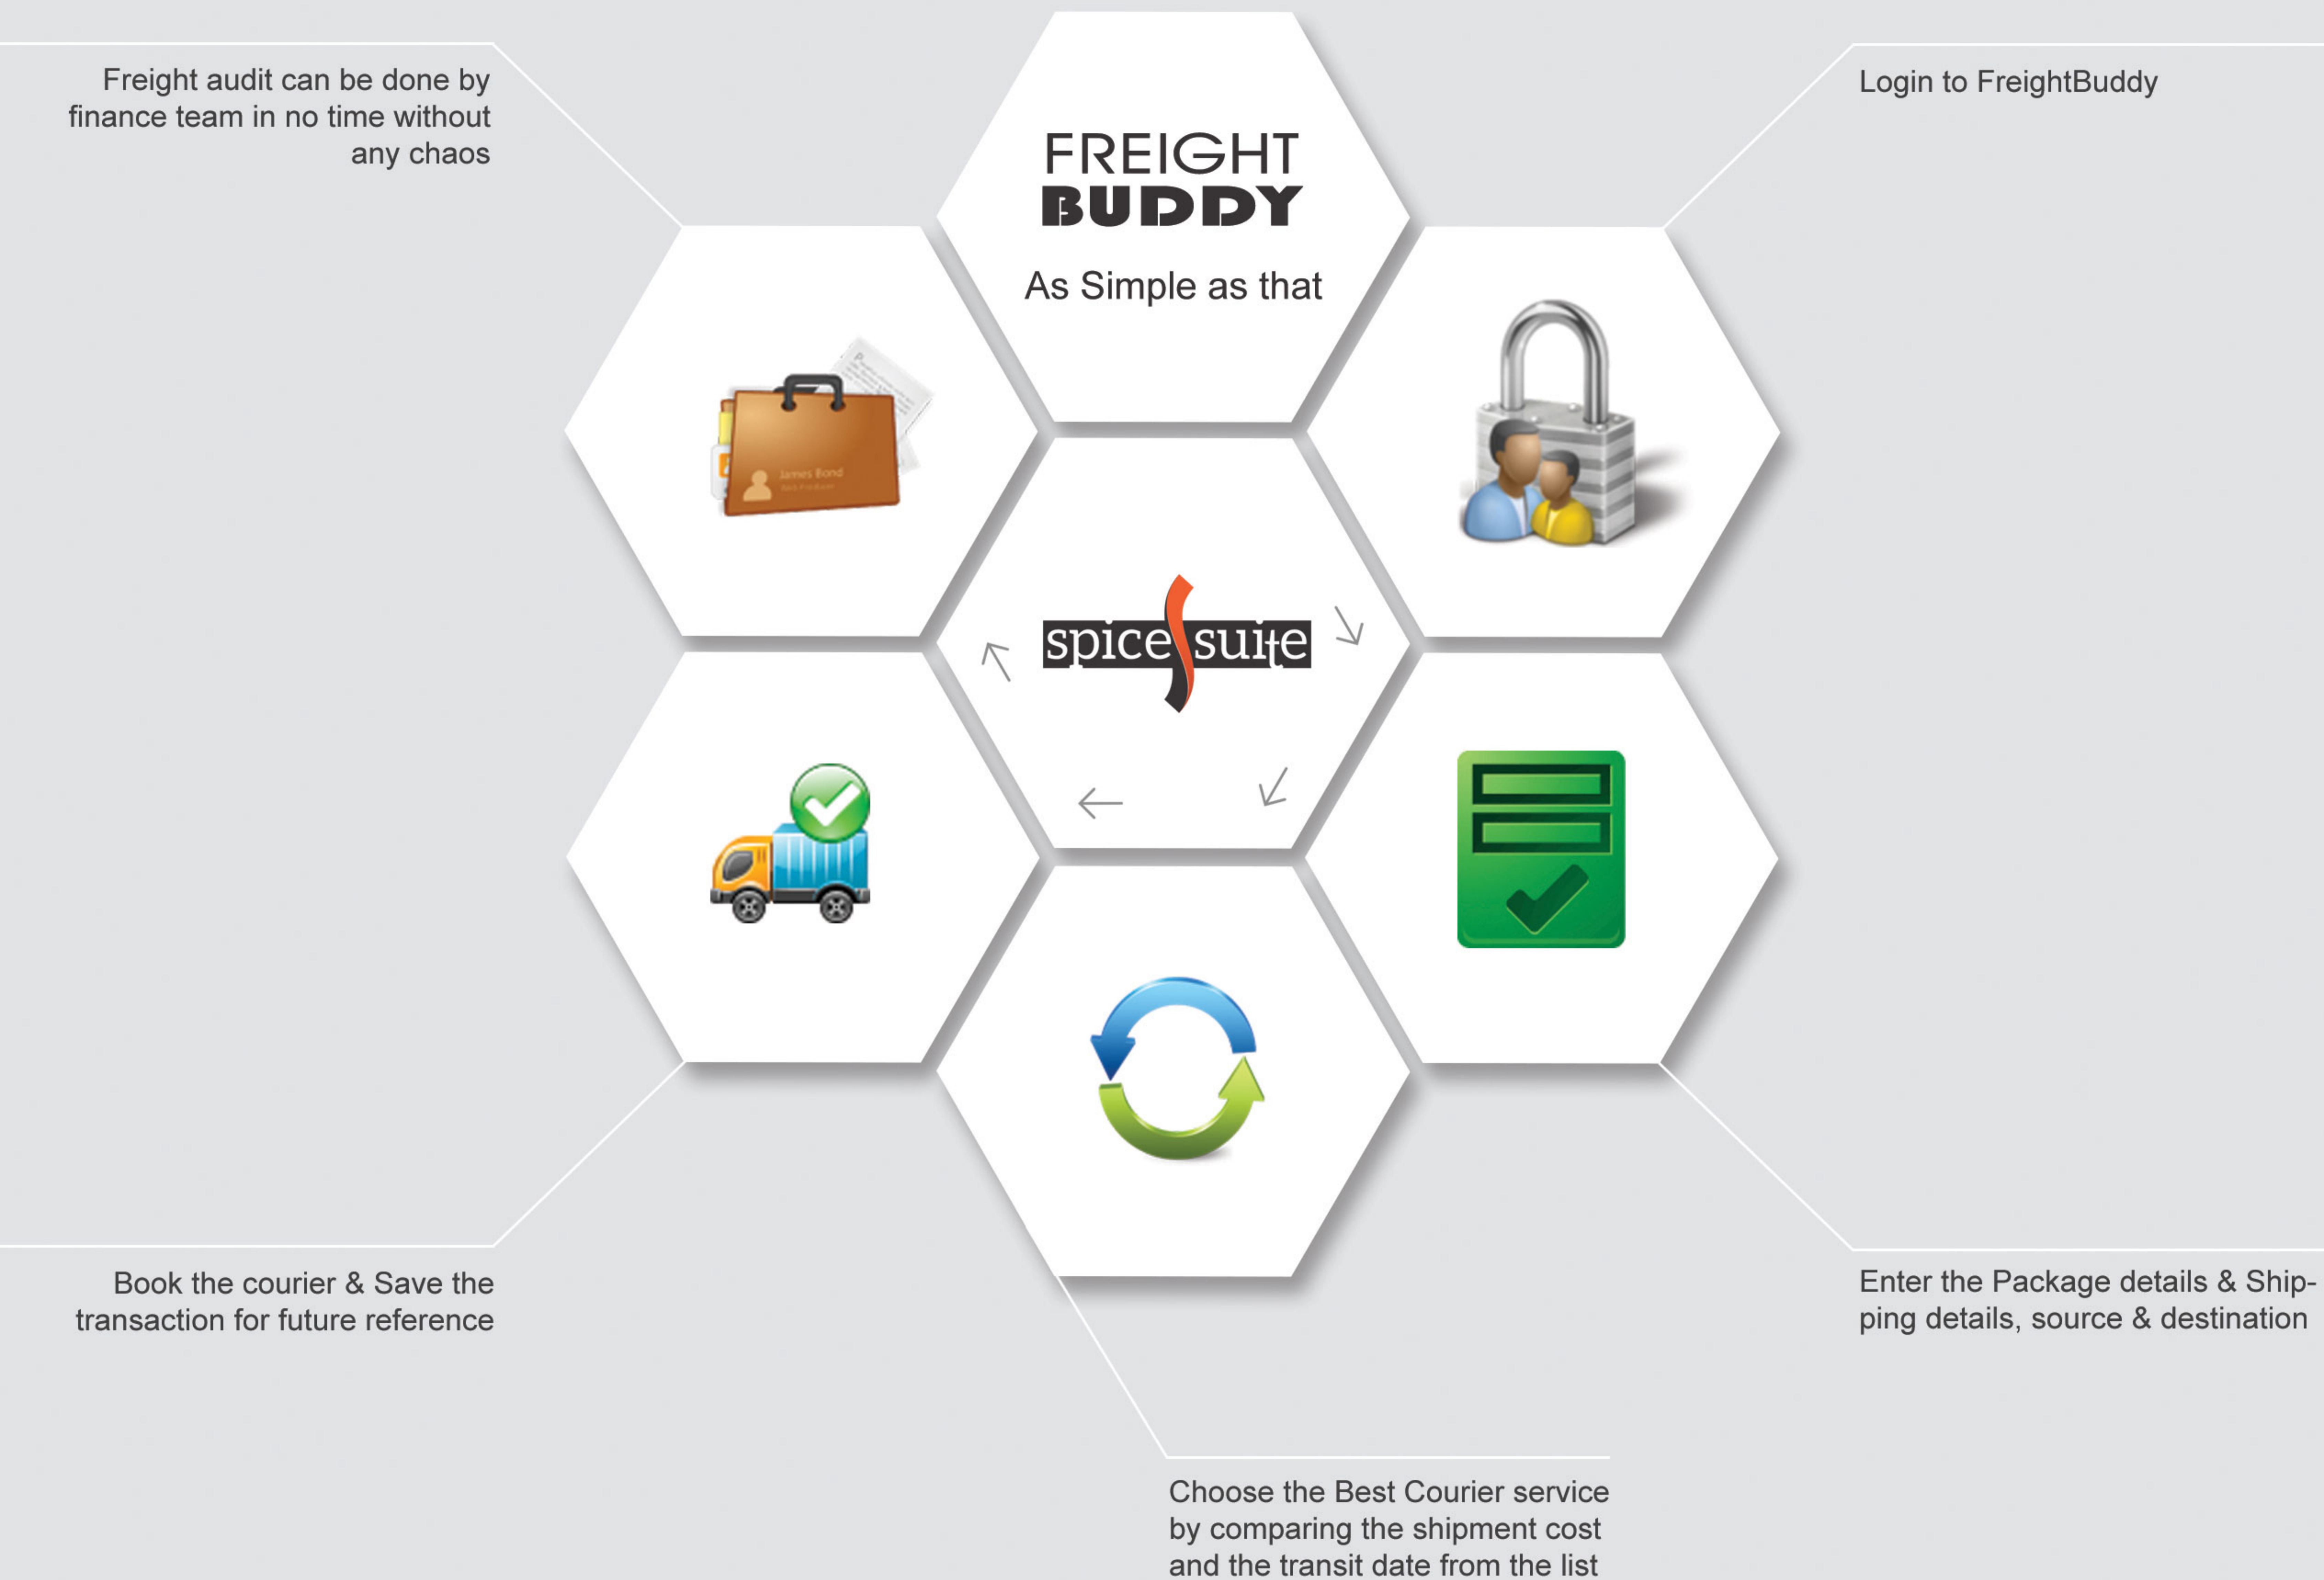

How it is benefited?

- Able to quote the customer right by choosing among all the courier services based on the priority whether it is quick delivery or budget.
- With FreightBuddy, Finance gets a chance to reconcile the courier bills. Incorrect bills are identified with ease and further action can be taken.
- FreightBuddy improves the productivity in sales team and procurement team.
- Helps in saving cost by avoiding payments for invalid and incorrect transactions.

Value Added Features

- **API Enabled:** FreightBuddy has in-built APIs to integrate with your ecommerce and inventory system.
- **Single Sign-On Service:** This can help to simplify password management, reduce help desk costs, improve productivity and strengthen security.

How it works?

FreightBuddy in a nutshell

- Improves efficiency
- Saves cost and time
- Enhances productivity
- Eases freight audit
